

Endorsed by Siemens  
Healthcare South Africa

## LED Features

- Low power usage less than 100 Watt (typical incandescent power usage approx 700 watt)
- No fusing of lights in the MRI environment which means no replacing of light bulbs
- MRI safe - Does not produce artefacts or spikes.
- Operates on DC voltage only
- Wider light angle of 110° (Incandescent only 80°)
- Built in emergency light backup of more than 5 hours

## EMC Compliance

- Compliant to CISPR 15 for lighting devices
